

What's the cost of a day's downtime to your business?

...prevent **COSTLY DOWNTIME** for less
than the cost of a cup of coffee per day.

PROTECH[™]
Computer & Internet Services

Keeping You Up & Running with Real-Time Server & Network Monitoring™

We take a completely different approach than other support companies in this city. Rather than waiting for you to discover problems and call us, we're proactive and find small problems before they become big calamities – saving you hours of downtime and frustration.

We have low-cost 'Real-Time Server & Network Monitoring' service we already provide to many similar sized companies locally. By using this service, other local companies are certain that their crucial business systems' are operating as they should.

Real-Time Server & Network Monitoring watches over critical parts of the system around the clock:

✓ Server health and performance	✓ Network speed and connectivity
✓ Disk space availability/ consumption	✓ Web page availability
✓ File and folder sizes are within expectations	✓ Vital Windows Services are working

And to keep you informed, our system will send you a short note every morning to confirm the checks we've done and the results. You'll see clear evidence of the value we deliver each and every day.
